Release Notes

Active Data Mover V1.4.0

January 2018

INDEX OF FEATURES

| | |
|-------------------------------------------------|---|
| 1. UPDATE OPERATION..... | 3 |
| 2. COMPATIBILITY MATRIX..... | 3 |
| 3. ACTIVE DATA MOVER V1.4.0 – JANUARY 2017..... | 4 |

1. Update operation

From version 1.4 onward, the Active Data Mover upgrade procedure verifies the prerequisites necessary for it to run correctly and also updates the corresponding dependencies if required. This operation requires an Internet connection.

For the detailed procedure, refer to the ADM installation and upgrade document:
ADM_Installation Guide-1.4-EN

2. Compatibility matrix

ADM 1.4.0 is only compatible with the latest version of Active Circle 4.6.2 and AMC 4.6.1.

For more information, please contact support.

3. Active Data Mover V1.4.0 – January 2017

SIGNATURE SHA256

89e690971949db5e794bf2ca0096b602e8071c677d4a8f5cba49ab81863ccf0b adm-1.4.0.bin

INSTALLATION AUTOMATION

The ADM 1.4 installer now verifies the prerequisites necessary for it to run properly. If required, the dependencies are updated automatically during installation, such as updating to facilitate its deployment.

NEW PREREQUISITES

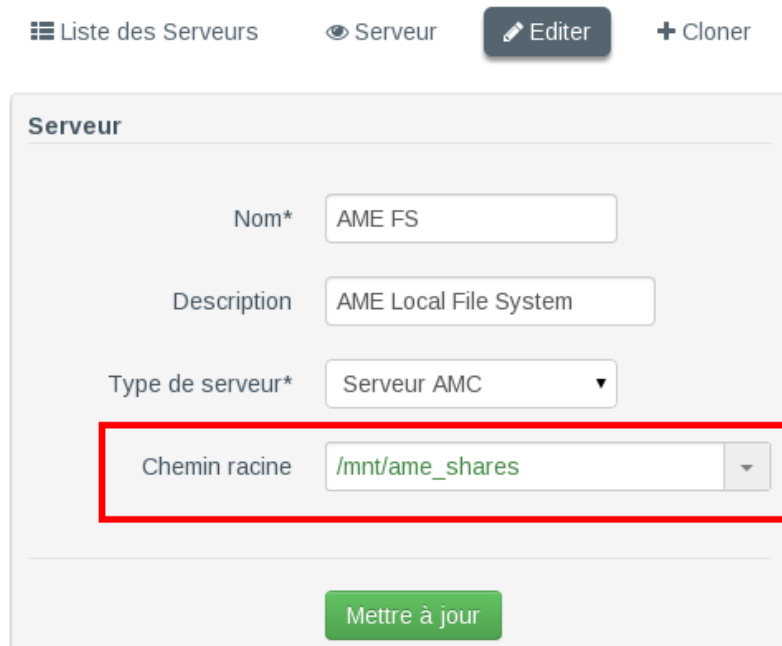

The ADM version 1.4 brings with it new prerequisites, as listed below:

| Type | Software |
|--------------------|-----------------------------|
| Operating System | CentOS Linux 7.0* or higher |
| Java | Java 8 |
| Application Server | Apache Tomcat version 7 |

*CentOS Linux 6.X is only supported for existing systems.

IMPROVEMENTS TO SERVER MANAGEMENT

Specify a working path (root path) for servers.

The screenshot shows a web interface for server management. At the top, there are navigation buttons: 'Liste des Serveurs', 'Serveur', 'Editer', and '+ Cloner'. Below this is a form titled 'Serveur'. The form contains the following fields:

- Nom*: AME FS
- Description: AME Local File System
- Type de serveur*: Serveur AMC (dropdown menu)
- Chemin racine: /mnt/ame_shares (dropdown menu, highlighted with a red box)

At the bottom of the form is a green button labeled 'Mettre à jour'.

Specify the preferred mode for FTP servers:

Mode préféré* Passif
 Actif

IMPROVED STRATEGIES

Perform data transfers to and from any server.

Better support for symbolic links for the "Local file system" source when users explore paths.

Fixed issue with encoding source and destination paths when updating a strategy.

GRAPHIC IMPROVEMENTS

Colors and logos have been updated to match the group's corporate image.

Track files being transferred.

Improved display of data sources through connection test performed in the background.

Added a thousand separator to the volumes displayed in the statistics.

Fixed an editing problem in Firefox and IE 10.

Improved strategy removal which was causing issues in certain situations.
